

Catppuccin Theme for L^AT_EX Documents

1 Simple Paragraph

This is what a simple paragraph looks like. Default text: **CtpText**. Background: **CtpBase**.

2 Hyperref

(internal) Link: 1

Citation: [1]

File: [goto file](#)

Menu: Only in Acrobat menu items

Run: no idea where this color is used

Url: <https://github.com>

References

[1] example bib item.

3 Math

You even can make math formulas, equations, and examples look nicer and more legible:

$$\lim_{n \rightarrow \infty} \int_a^b \frac{\sin(nx)}{x} dx$$

(Or just color dump like I did)

4 Code Snippets

Listing 1: A ruby on rails code sample

```
class PageController < ApplicationController
  protect_from_forgery with: :exception
  before_action :do_some_for_pages

  ...

  This action creates a new page
  ...

  def new
    @page = Page.new
    creator = current_user || @admin

    # Check if a creator is present
```
